Plastic Pipe	33% of Truckload

See CPF Plastic Pipe Loading Chart / Calculator at www.charlottepipe.com

Plastic Fittings Minimum Order Requirements

The minimum order amount is \$250 net, regardless of the product line or mix.

All plastic fitting orders are expected to follow the requirements below:

- ABS and PVC DWV (4" and below) should be ordered in full box quantities
- CTS and CTS Brass Transitions should be ordered in full bag quantities
- PVC Schedule 40 Pressure (2" and below) should be ordered in full box quantities
- PVC Schedule 30 Thin wall should be ordered in full box quantities

Please note: PVC DWV Large Diameter (6"-16"), PVC Schedule 40 (2-1/2" – 8"), PVC Schedule 80, and ChemDrain fittings can be ordered in any quantity.

Plastic Pipe Shipping Changes

As a reminder, due to the risk of product damage and higher LTL fees, all plastic pipe, including CTS and ChemDrain pipe, will only be shipped on a flatbed truck, subject to the FFA minimum of 1/3 (33%) truckload.

LTL shipping is no longer an option for twenty-foot (20') length pipe; however, ten-foot and fourteen-foot (10' / 14') lengths can ship LTL with a surcharge determined by the carrier. Plastic pipe requested to be shipped LTL will be shipped customer collect.
